Glacial Water From Mt. Chokai

Mount Chokai, also known as Akita-Fuji, is a volcanic mountain located in the northern part of Honshu Island, Japan. It is situated on the border between Akita and Yamagata prefectures and has an elevation of 2,236 meters (7,336 feet).

Mt. Chokai is **a source of glacial water that is considered to be of high quality and purity**. The mountain is home to several glaciers, which provide a continuous supply of fresh water to the surrounding area. The water is filtered naturally by the mountain's volcanic rocks and is free of impurities and pollutants.

The glacial water from Mt. Chokai is prized for its refreshing taste and health benefits. **It is rich in minerals such as calcium, magnesium, and potassium, and is considered to be one of the cleanest and purest sources of water in Japan.** Many local residents and businesses rely on the mountain's glacial water for drinking, cooking, and other purposes.
